

# PLANT SCIENCES, B.S.

---

**Begin Campus:** Any Penn State Campus

**End Campus:** University Park

## Career Paths

Opportunities for Plant Science majors include careers in agronomic and horticultural crop production systems, sustainable agriculture and ecosystem science, crop protection, applied plant physiology, plant science research, and plant biotechnology. Plant Science majors gain skills and abilities for entering careers upon graduation or for pursuing graduate studies.

## Careers

Plant Science major graduates have found fulfilling careers in plant science research, marketing and sales, plant health and protection, sustainable agriculture and food systems, public gardens and arboretums, greenhouse and nursery production and management, cooperative extension, plant biotechnology, resource protection, farm management, and government or non-government agencies.

## Opportunities for Graduate Studies

While most students seek immediate job placement upon graduation, the Plant Science major also prepares students for pursuing graduate studies in areas related to ecology, plant pathology, soil science, horticulture, agronomy, international agriculture, entomology, and other biological areas.
